

## Ordering Certified FINOLA Planting Seed for 2017

### Dear Customer,

To order your OECD certified C-1 FINOLA planting seed for 2017, please read these instructions carefully. The seed is packaged for commercial distribution in 25 kg bags. Each bag has only one official certification tag. The certification tag is required to receive the EU subsidy. For our customers in the US- you must have a DEA import permit and a supporting letter from your State Agriculture Department, before we can begin to discuss your order.

**We suggest a seeding rate of 25-30 kg/ha.** Good soil conditions, sufficient fertilization and correct sowing depth are essential for this variety. Please read our basic farming information on this page: <http://www.finola.fi/>.

### Seed prices per 25 kg bag for 2017

Number of 25 kg Bags	Minimum Hectares	Price/bag	€/kg
1 to 10 bags	1 - 10 hectares	€ 250.00	10.00
11 to 25 bags	11 - 25 hectares	243.75	9.75
26 to 40 bags	26 - 40 hectares	237.50	9.50
41 to 120 bags	41- 120 hectares	231.25	9.25

Please contact me by phone or e-mail to discuss prices for larger orders.

**A handling fee of €75 plus €1/bag is added to each order.** This fee includes labor, the pallet, packing, wrapping, loading and shipping documents.

### **Ordering your SEED**

Be sure to place your seed order early, to ensure availability. After you know the number of 25 bags you would like, use the link below to place your order:

<http://finola.fi/order-eng.php>

**After placing your order,** an invoice will be sent to you by e-mail. This invoice will include the seed price, a quote for door-to-door transport costs and the handling fee. If you are in the EU, and do not have a VAT number, 24% will be automatically added to your invoice, for the Finnish tax office.

**All orders must be paid by direct bank transfer before shipping is allowed.** We do not accept payments by credit card. After we have received your payment, I will contact you and provide an estimation of the expected delivery date for your seed and the CMR tracking code (upon request).

**We have a limited supply of planting seed.** We suggest that you order your seed early. Those who pay first are given priority.

**Our responsibilities do not include** possible taxes in your country, or insurance on the shipment. If you are ordering from outside of the EU, be sure to understand that it will be your responsibility to receive this shipment at your nearest port of entry, clear it through your customs inspection, pay any additional importation taxes or fees, and eventually organize your own transport to a final destination.

### **Current status of FINOLA in the European Union for 2017**

FINOLA remains on the EU Commission's list of approved hemp varieties, and European farmers are entitled to a subsidy for cultivating FINOLA in all 28 EU Member States, including the United Kingdom. If field samples are still collected for THC testing in your country, please be sure to help your agricultural officials plan for the correct time to collect FINOLA field samples; between 55 to 65 days after sowing. Also, please inform me if FINOLA samples are collected from your field at a later date. To understand more about the correct sampling time for this variety, we have posted useful information on FINOLA's morphology and development on this page: <http://www.finola.fi/>.

**Contact and Availability:** If you are new customer, please read these instructions again. We are unable to respond to every question, so we hope that you will find answers and useful information from our web pages, before contacting. In general, we do not comment on cannabinoids, except to say that FINOLA is below 0.1% THC when it is sampled according to EU regulations.

For voice contact, please send me a text message or e-mail, so we can make an appointment, before your call. Thanks in advance!
