

Ordering Certified FINOLA Planting Seed for 2018

Dear Customer,

To order your OECD certified C-1 FINOLA planting seed for 2018, please read these instructions carefully. This seed is packaged for commercial distribution in 25 kg bags. Each bag has only one official certification tag. The certification tag is required to apply for the European Union crop subsidy. For customers in the USA- before we can begin to discuss your order, you must have a DEA import permit and a supporting letter from your State Department of Agriculture.

We suggest a seeding rate between 25-30 kg/ha. Good soil conditions, sufficient fertilization and correct sowing depth are essential for this variety. Please read our basic farming information on this page: <http://www.finola.fi/>.

Seed prices per 25 kg bag for 2018

Number of 25 kg Bags	Minimum Hectares	Price/bag	€/kg
1 to 12 bags	1 - 12 hectares	€ 250.00	10.00
13 to 20 bags	11 - 20 hectares	243.75	9.75
21 to 40 bags	21 - 40 hectares	237.50	9.50
41 to 120 bags	41- 120 hectares	231.25	9.25

Orders less than 20 bags may be sent to our distributors in Central Europe. Please contact me by e-mail to discuss prices for orders over 120 bags.

A handling fee of €75 plus €1/bag is added to each order. This fee includes labor, the pallet, packing, wrapping, loading and shipping documents.

Ordering your SEED

After you know the number of 25 bags you would like, use the link below to send us your order and deliver information:

<http://finola.fi/order-finola/>

After placing your order, an invoice will be sent to you by e-mail. This invoice will include the cost of the seed, a quote for door-to-door transport costs and the handling fee mentioned above. If you are in the European Union, and if you do not have a VAT number, the tax will be added to your invoice.

All orders must be paid by before shipping. We do not accept payments by credit card. After we have received your payment by bank transfer, your seed will be sent. You will also receive an estimation of the expected delivery date for your seed and the CMR tracking code (upon request).

Our responsibilities do not include possible taxes in your country, or insurance on the shipment.

If you are ordering from outside of the European Union; import and export permits are required, in addition to phytosanitary documents. Be sure to understand that it will be your responsibility to receive this shipment at your nearest port of entry, clear it through your customs and agricultural inspections, pay any additional importation taxes or fees, and eventually organize your own transport to a final destination. We do not do this for small orders.

Current status of FINOLA in the European Union

FINOLA remains on the EU Commission's list of approved hemp varieties, and European farmers are entitled to a subsidy for cultivating FINOLA in all EU Member States, including the United Kingdom for 2018. If field samples are still collected for THC testing in your country, please be sure to help your agricultural officials plan for the correct time to collect FINOLA field samples; about 55 days after sowing. Also, please inform us if samples are collected from your field at a later date. To understand more about the correct sampling time for this variety, we have posted useful information on FINOLA's morphology and development on this page: <http://www.finola.fi/>.

Contact and Availability: If you are new customer, please read these instructions again. We are unable to respond to all questions, and we hope you will find answers to your questions and other useful information from the information we have posted on our web pages.

For voice contact, please send me an e-mail first. Advance thanks!
