

How to Order Certified FINOLA Planting Seed

Please use the link below to send us your order and deliver information:

<http://finola.fi/order-finola/>

Our planting seed is certified in 25 kg bags. Each bag has its own official C1 seed tag, which proves that your crop is FINOLA. This C1 tag may not be legally used to resell smaller amounts of seed from the certified 25 kg bag.

We suggest a seeding rate between 25-30 kg/ha. Good soil conditions, sufficient fertilization and correct sowing depth are essential for this variety. Please read our basic farming info, found on this page: <http://www.finola.fi/>.

Seed prices for orders less than 300 kg, without transport costs

Number of 25 kg Bags	Minimum Hectares	Price*	€/kg
1 bag, 25 kg	1 hectare	€ 275.50*	€ 11.50
2 bags, 50 kg	2 hectares	€ 575.00*	€ 11.50
3 bags, 75 kg	3 hectares	€ 862.50*	€ 11.50
...
12 bags, 300 kg	12 hectares	€ 3450.00	€ 11.50

*Orders less than 4 bags must be sent separately by UPS, with a €40 handling charge added **for each bag**. Orders with more than 4 bags are sent on a wooden pallet, with no extra handling charge. We can ship up to 500 kg (20 x 25 kg bags) on one wooden pallet.

It is a slow and expensive process to send small orders from Finland. For this reason, orders that are less than 500 kg will be invoiced and sent from one of our distributors in Central Europe, to save you time and money on the delivery.

Please contact me directly at callaway@finola.fi to discuss prices, terms and logistics for orders that are over 500 kg.

After placing your order, an invoice will be sent to your e-mail address. Your invoice will include the full costs for the seed, handling and delivery. If you live in the EU and do not have a valid VAT number for cross border transactions, then 19% will be added to your invoice, because we must pay this tax for you.

All orders must be paid before shipping. We only accept payments by direct bank transfer. We do not accept payments by credit card. Please, do not send partial payments! Your seed will be sent after your payment has arrived.

Current status of FINOLA in the European Union

FINOLA is on the official list of approved hemp varieties in Europe, and European farmers are entitled to the CAP subsidy payment for the cultivation of FINOLA in all EU Member States, including the United Kingdom and Switzerland. If official field samples are collected for THC testing in your country, please be sure to help your agricultural officials plan for the correct time to collect FINOLA field samples; about 55 days after sowing. The sampling time is about 45 days in hot or dry climates. Also, please inform us if official samples are collected late from your field. To understand more about the correct sampling time for this variety, we have posted useful information on FINOLA's morphology and development on this page: <http://www.finola.fi/>.

Contact and Availability: I really enjoy hearing from all the nice people that grow hemp, or want to grow hemp, and I wish there were enough time to give personal advice to everyone. Since this is not always possible, we have posted a wide range of practical information on our web pages.

If you desire more information on the FINOLA variety, please look and see if your questions can be answered in one of our PDFs.
