

How to Order Certified FINOLA Planting Seed

Please use the link below to send us your order and deliver information:

<http://finola.fi/order-finola/>

We are not sending seed outside of the Euro Zone in 2019

Our planting seed is certified in 25 kg bags. Each bag has its own official C1 seed tag, which proves that your crop is FINOLA. This C1 tag may not be legally used to resell smaller amounts of seed from the certified 25 kg bag.

We suggest a seeding rate between 25-30 kg/ha. Good soil conditions, sufficient fertilization and correct sowing depth are essential for this variety. Please read our basic farming info, found on this page: <http://www.finola.fi/>.

Seed prices for orders less than 250 kg*, without transport costs

Number of 25 kg Bags	Minimum Hectares	Price*	€/kg
1 bag, 25 kg	1 hectare	€ 275.50*	€ 11.50
2 bags, 50 kg	2 hectares	€ 575.00*	€ 11.50
3 bags, 75 kg	3 hectares	€ 862.50*	€ 11.50
...
10 bags, 250 kg	10 hectares	€ 3450.00	€ 10.00
Over 10 bags	Over 10 hectares	Inquire	Less

*It is a slow and expensive process to send small orders from Finland. For this reason, orders that are less than 250 kg will be invoiced and sent from one of our distributors in Central Europe, to save you time and money on the delivery.

Orders that are less than 4 bags must be sent separately by UPS, with a €40 handling charge added **for each bag**. Orders with more than 4 bags are sent on a wooden pallet, with no extra handling charge. We can ship up to 750 kg (30 x 25 kg bags) on one EUR pallet. Just send your order to <http://finola.fi/order-finola/>

After placing your order, please be patient. An invoice will be sent to you, which includes the full cost of the seed and door to door transport. If you live in the EU and do not have a valid VAT number for cross boarder transactions, then this tax will be added to your invoice, because we must pay this for you.

All payments must be received before your seed is shipped. We only accept payments by direct bank transfer. We do not accept credit cards. We do not accept cryptocurrencies. Please, do not send partial payments! Your seed will be shipped only after your payment has arrived.

Current status of FINOLA in the European Union

FINOLA is on the official list of approved hemp varieties in Europe, and European farmers are entitled to the Single Payment (CAP) subsidy for the cultivation of FINOLA in all EU Member States. If official field samples are collected for THC testing in your country, please be sure to help your agricultural officials plan for the correct time to collect FINOLA field samples; about 55 days after sowing. The correct sampling time typically begins about 45 days after sowing, and even sooner in hot or dry climates. Also, please inform us if late samples are collected from your field. To understand more about the correct sampling time for this variety, we have posted useful information on FINOLA's morphology and development on this page: <http://www.finola.fi/>.

Contact and Availability: I really enjoy hearing from all the nice people that grow hemp, or want to grow hemp, and I wish there were enough time to give personal advice to everyone. Since this is not always possible, especially in the spring, we have posted a wide range of practical information on the Finola web pages. If you desire more information on the FINOLA variety, or hemp in general, please look and see if your questions can be answered in one of our PDFs. I do not like to comment on potential CBD yields, because this is a complex topic with many moving parts, and the results can vary widely, depending on the growing conditions and time of harvest. There no clear answer that will satisfy everyone. This is the same for any hemp variety, and you really won't know until you have done the work yourself. Then we can have a more interesting conversation, once you have some data to analyse.
